SUMMARY

I design, develop, and deploy complex result driven digital automated solutions for the Banking and Finance Industry, using Python,React JS, Azure, Shell, JavaScript, SQL, and other frameworks improving the performance and reliability of the systems and applications. Active contributor to open-source Python projects and GitHub repositories.Passionate about **AI-driven automation, fintech solutions, and scalable backend architectures**.

SKILLS

Technical: Python, JavaScript, ReactJS, Azure,AWS, Terraform, Kubernetes,Machine Learning,Deep Learning , Computer Vision, Flask/Dash, NodeJS, Java, SQL, Shell, C++, CI/CD , Gitlab, Splunk, Chaos Engineering, Geneos, AppDynamics,Azure Databricks, Azure Data Factory.

WORK EXPERIENCE

UBS Pune, India

AI/ML Platform API Developer Sep 2024 - Present

- Developed and maintained an AI/ML platform with capabilities for **experimentation, model serving, and deployment** at a production scale with production data.
- Designed and implemented APIs using **Python (FastAPI, Flask)** to integrate with **Azure Machine Learning, Azure Kubernetes Service, and Azure Data Lake**.
- Optimized model deployment workflows, reducing deployment time by **40%**, and ensuring seamless data pipeline integration with real-time monitoring.
- Collaborated with data scientists and MLOps engineers to enhance the **scalability, security, and performance** of AI-driven applications.

Software Development Engineer II Aug 2020 - Sep 2024

- Developed, optimized, and maintained cloud-based applications using Python, Flask, and ReactJS.
- Automated daily release planning, reducing manual efforts by **40%** using Python-based pattern analysis and data modeling with **PERN Stack**.
- Enhanced system performance by **70%** through intelligent design, efficient database integration, and API development.
- Built 0 to 1 automated solutions, replacing manual server and database health checks with Azure chatbots and scripts.
- Led a data **migration and optimization project using Splunk**, improving query execution time by **50%**.
- Designed and implemented a **full-stack web application** using **Python (Flask), React, and PostgreSQL**, improving user experience and efficiency.
- Enabled live monitoring of over **99 live Application** by onboarding **production** servers to Enabled live monitoring of over 40 processes by onboarding servers to **Geneos**, ensuring 100% uptime monitoring.
- Leveraged automation and development technologies to execute operational stability and maintenance task using **AppDynamics for monitoring, Splunk** for huge data modelling and various other monitoring tools.
- Automated data validation workflows using Python and Shell scripting, saving 10+ hours per week for the team.
- Led and executed multiple projects to create, maintain and upgrade various server and database checks using solution such as chatbot, scripts etc and displacing the whole manual process by an end-to-end automated solution saving 100% efforts.

UBS Pune, India

Investment Banking Analyst Apr 2021 - Oct 2021

- In spirit of learning and cross functional collaboration, took on the role of an Investment Banking analyst for 6 months in UBS Global Banking India team. Worked on several M&A deals with the core team and senior bankers.
- Spearheaded the initiative to rehaul and upgrade the sponsorship deck for entire team. Was part of several client deck creation and pitch meetings.

IIRS, ISRO Dehradun, India

Data Science Research Intern Jul 2019 - Dec 2019

- Conducted research in **computer vision and deep learning**, leveraging **ResNet and UNet** models for satellite image segmentation.
- Implemented **IoU-based evaluation** to compare multiple deep learning architectures using TensorFlow and PyTorch.

Fidelity Internationals Gurgaon,India

Technology Summer Intern May 2019 - Jun 2019

- Developed a **blockchain-based self-sovereign identity system** for portfolio managers.
- Built a mobile and desktop prototype for client presentation automation, enhancing client acquisition.

EDUCATION

Banasthali Vidyapith, Rajasthan

B. Tech in Computer Science Engineering | 8.78 CGPA

PROJECT EXPERIENCE

- **Order Management System** : Developed a trading platform using **PERN stack** and Python, implementing stock matching algorithms, real-time trade execution, and a data analytics dashboard for insights.
- **Train Your Child’s Mind (AI-Powered Educational App)** : Developed an **AI-driven educational app** using **Flask, React, and NodeJS**, improving app performance by **20%** and increasing user engagement by **30%**.
- **Building Detection and Segmentation from Aerial Images (ISRO)**
- **Smart Ship Detection using Transfer Learning (ISRO)**

CERTIFICATION

- Stanford - Supervised Machine Learning: Regression and Classification - [DeepLearning.AI](#) • 2024
- Generative AI for Software Development Skill Certificate - [DeepLearning.AI](#) • 2024
- GitLab with Git Essentials & GitLab Certified Git Associate Exam - Gitlab • 2023
- AZ -900 - Microsoft • 2023
